

Description

MAX-CLAM is a professional auto open heat press machine. It is designed for high-quality heat transfer printing on various materials. The machine features a digital temperature control system and a safety lock mechanism to ensure precise and safe operation.

MAX-CLAM is available in two models: MAX-15CLAM and MAX-20CLAM. Both models offer a wide range of platen sizes to accommodate different printing needs.

The MAX-CLAM heat press is equipped with a digital display and control panel, allowing for easy temperature and time adjustments. The auto-open function simplifies the printing process, making it ideal for both professional and home use.

The machine is built with a sturdy metal frame and a high-quality heating element, ensuring long-lasting performance and consistent results. The safety features include a digital lock that prevents the upper platen from closing until the temperature is reached.

MAX-CLAM is a reliable and efficient heat press solution for your business or hobby. It offers a professional-grade printing experience with a user-friendly interface and robust construction.

Feature

The heat press features a digital temperature control system with a display and buttons for precise temperature setting.

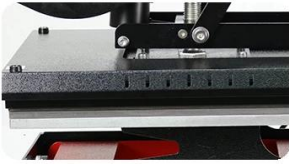

The machine includes a safety lock mechanism that prevents the upper platen from closing until the temperature is reached, ensuring safe operation.

The auto-open function allows the upper platen to automatically open once the printing process is complete, making it easy to remove the finished product.

The machine is equipped with a sturdy metal frame and a high-quality heating element, ensuring long-lasting performance and consistent results.

MAX CLAM 15/20吋 雙面切板機

Specification

型號	MAX-15CLAM/ MAX-20CLAM
品牌	MAX
尺寸	15"x15"/ 16"x20" (38x38cm/ 40x50cm)
重量	約 15kg
電壓	GY-06 雙面切板機
刀片數量	刀片 6 片
刀片厚度	50µ
刀片寬度	約 15cm
電壓	120V/220V
功率	1750W/1800W
速度	0-999 轉/分
溫度	225°C
尺寸	54x88x57cm
重量	約 60kg

Application

MAX CLAM 雙面切板機 T 型切板機 MAX CLAM 雙面切板機 T 型切板機 MDF 切板機
