

Description

Medium 24" (60cm) DTF Printer equipped with Dual 13200 Printer Heads, a powerhouse designed for precision and efficiency in printing PET film vinyl for clothing. Boasting Epson's original 13200 print heads, this machine guarantees high-speed performance, impeccable resolution, and remarkable durability.

Feature

Efficiency, Resolution & Precision at Its Core: Medium 24" (60cm) DTF Printer equipped with Dual 13200 Printer Heads, a powerhouse designed for precision and efficiency in printing PET film vinyl for clothing. Boasting Epson's original 13200 print heads, this machine guarantees high-speed performance, impeccable resolution, and remarkable durability.

Ease of Operation: The DTF-60 is engineered with user-friendliness in mind. Its intuitive interface makes it easy to operate, and maintenance is a breeze. Say farewell to complicated setups and laborious upkeep tasks.

Versatile and Robust: With a printing width ranging from 0 to 600mm, the DTF-60 is a versatile powerhouse that can handle a wide range of apparel types and sizes. Whether you're dealing with t-shirts, hoodies, or any other garment, this pro DTF solution has you covered.

Specification

Model No.	DTF-60
Printer Head	2x13,200 Epson 13200
Print Width	600mm
Applicable Media	PET film
Printing Speed	Approx. 120h, Speed 300h
Printing Resolution	720dpi/500dpi/1440dpi
Print Color	CMYK+White
Ink Type	DTF Ink
Ink Consumption	Color Ink 30ml + White Ink 200ml per approx. 600mm
Print head cleaning	Automatic
Platform Section	Yes
Automatic Inkbedding	Yes
White Ink Stirring Function	Yes
White Ink Circulation Function	Yes
Operating System	XP1 Win7 Win10 Win11
Interface	USB Ethernet
Software	SA PrintShop
Language	Chinese/English/Spanish/French/Italian/Portuguese/German, etc
Voltage	110V/220V
Power Consumption	300-570W
Working Environment	Temperature 15-30 °C
Printer Size (Weight)	1180x675x1020mm/120KG
Printer Size (Weight)	1180x675x1020mm/120KG
Packing Size of Printer (Weight)	1310x840x1740mm/200KG
Packing Size of Power Supply (Weight)	1390x810x1110mm/200KG

Epson 13200 Printhead Advantages
The inclusion of the Epson 13200-A1 printhead is a testament to the DTF-60's commitment to excellence. This state-of-the-art printhead features automatic cleaning, automatic flush spray, and mistooling functions, ensuring uninterrupted printing. Providing high-speed printing, exceptional resolution, and outstanding durability.

MACHINE DETAILS

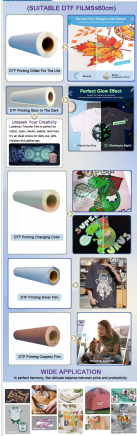

Differences Between DTF & DTG		
Machine	DTF (Direct To Film)	DTG PRINTING (Direct To Garment)
Media Type	Cotton, Polyester, Leather, PVC, EVA Etc	Cotton, Leather Only
Scope Of Application	Suitable For Bulk Printing & DIY Customized Printing	Suitable For Small Shop & Customized Printing
Printing Processing	Whole Automatic Processing Or Manual Processing (Optional)	Manual Pre-treatment Processing
White & Pre-treatment Printing Request	Normal White Printing	More Pre-treatment, More White Printing On Dark Colored Cloth
Colors	Various & Bright colors	Various & Bright colors
Washing Ability	Strong	Weak
Ink Cost	Cheap	Expensive
Film & Power Request	Yes	No, But Pre-treatment Liquid Request
Heat Press Request	Yes	Yes

Machine Warranty

* 1 Year for entire machine except the printer head and damper/cap/toplink/pumpink/tube/ink tank these consumable parts.
** Lifetime online support on machine maintenance.

Application

Machine Maintenance Instructions:

All around print head, Wiper, and Cap Top Lifting Plate Cleaning: These components are crucial for maintaining the integrity of your printer. Ensure they are kept clean at all times to prevent ink buildup and potential blockages. Regularly inspect and clean these parts as needed.

Trolley Track Lubrication: Every two to three days, apply a suitable lubricating oil to the trolley track. This ensures smooth movement and prevents any friction-related issues that could affect print quality.

Encoder Strip Care: To maintain accurate positioning and avoid printing errors, it's essential to wipe the encoder strip with a dry, clean fabric every month. Dust and debris can accumulate on the strip over time, so regular cleaning is crucial.

Periodic Machine Operation: If the machine is not in use for an extended period, it's advisable to turn it on every two or three days. This helps prevent the print head from becoming blocked due to ink drying. You can either print a test strip or schedule some print tasks to keep the ink flowing smoothly.

Continuous Cleaning: Regularly clean the entire machine to ensure it operates at its best. Keeping it in pristine condition, like a new machine, is ideal for consistent and high-quality printing. This includes cleaning the printhead, rollers, and any other accessible parts that may accumulate dust, ink residue, or debris.

By following these maintenance instructions diligently, you can prolong the lifespan of your printer and maintain optimal print quality. Regular cleaning and upkeep will help ensure that your machine consistently performs like new, reducing downtime and maintenance costs.
