

Description

E Series [heat press machines](#) use the most advanced electric control system to achieve the full automatic operation. This electric powered [sublimation heat press machine](#) won several national patents of USA and Europe. With superior quality and high performance, this [auto heat press](#) brings you greater productivity in the sublimation.

To provide more options, we develop two sizes of [electric powered heat press machine](#): 38x38cm and 40x50cm. You can choose different sizes according to the sublimation materials.

Electric design is with lower noise compared to [heat press machine](#) with air compressor; safety button designed for any emergency situation. High efficiency & excellent pressure compared to auto open heat press. E Series electric powered heat press has the similar finish but save more energy.

This [sublimation heat press](#) is suitable for any sublimable or transferable product. For example: T-shirts, frames, slippers and other flat products.

This fully [automatic heat press machine](#) is perfect for commercial use.

Feature

Bigger Motor: The bigger motor generates stronger pressure and higher efficiency. The automatic function not only increases the speed of production but also guarantees good finish.

Advanced Digital Controller: Simple design and clear system. It is very easy for user to operate. Live digital time and temperature readout for accurate results every time with production cycle counter.

Emergency Stop Button: In case of any emergency, user can press down this switch to stop the operation.

Anti-Scald Protect Cover: Metal cover above the heat platen. It can protect user from scalding.

Safe Design-Limit Switch: The heat platen will down only after the under base touch the switch. It can avoid injury by incorrect operation with this soft design.

Electric Powered

E Series use the most advanced electric control system to achieve the full automatic operation. Smarter and safer.

Auto Down & Auto Open

Full automatic with auto press down and auto open, by simply pressing two buttons. Largely reduce the fatigue of the operator.

Adjustable Pressure

Easy pressure adjustment according to the thickness of items. Program up to 10 different pressure; High pressure applications.

Upgraded Digital Controller

GY-08 controller with different pressure and dual time setting. It also stores frequently used settings, production cycle counter.

High Efficiency

Perfect for high volume commercial use, specialty decorators, direct-to-garment printing, and embossing etc.

Safe Operation & Less Noise

User-safe two-hand push button operation with CE certification. Full automatic without noisy air compressor.

Specification

Model No.	E-15S/ E-20S
Machine Type	Full Automatic, Slide-out Under Plate
Platen Size	15"x15" (38x38cm)/ 16"x20" (40x50cm)
Voltage	110/ 220V
Frequency	50/ 60HZ
Controller	GY-08 controller with Dual time setting
Gross Weight	66kg/ 70kg
Carton Size	90x57x66cm/ 90x57x66cm
Certification	CE Approval
Patten No.	ZL 2015 2 0884686.5

Application

This Electric powered full auto heat press machine is suitable for any sublimable or transferable product. For example: T-shirts, photo frames, slippers, mouse pads, sportsware and other flat products.

HD Metal Prints

T-shirts
