

Description

In conjunction with our cutting-edge automated material handling solutions, we are proud to unveil the SSB-004 Precision Alignment Device. Designed to complement our automated loading and unloading systems, this innovative infrared alignment tool redefines precision in apparel decoration.

Key Features:

Enhanced Precision: The SSB-004 assists users in accurately positioning designs onto T-shirts, ensuring precise alignment for great results.

Infrared Technology: Leveraging advanced infrared technology, this device offers high-precision alignment capabilities, enabling users to achieve perfect placement with ease.

Maneuverability: Equipped with omnidirectional wheels, the SSB-004 is effortlessly movable, allowing users to position it conveniently for optimal alignment.

Streamlined Workflow: Seamlessly integrated with our automated material handling solutions, this alignment device enhances workflow efficiency and productivity, ensuring seamless operations from loading to decoration.

Specification

Model No.	SSB-004
Machine Type	Laser Precision Alignment Device
Voltage	110V/ 220V
Power	10W
Packing Size	160x70x85cm (Wooden Box)
Net Weight	42kg
Gross Weight	52kg
