

Description

The machine is used to make the stencil. It can stretch the polyester mesh on the screen frames.

Feature

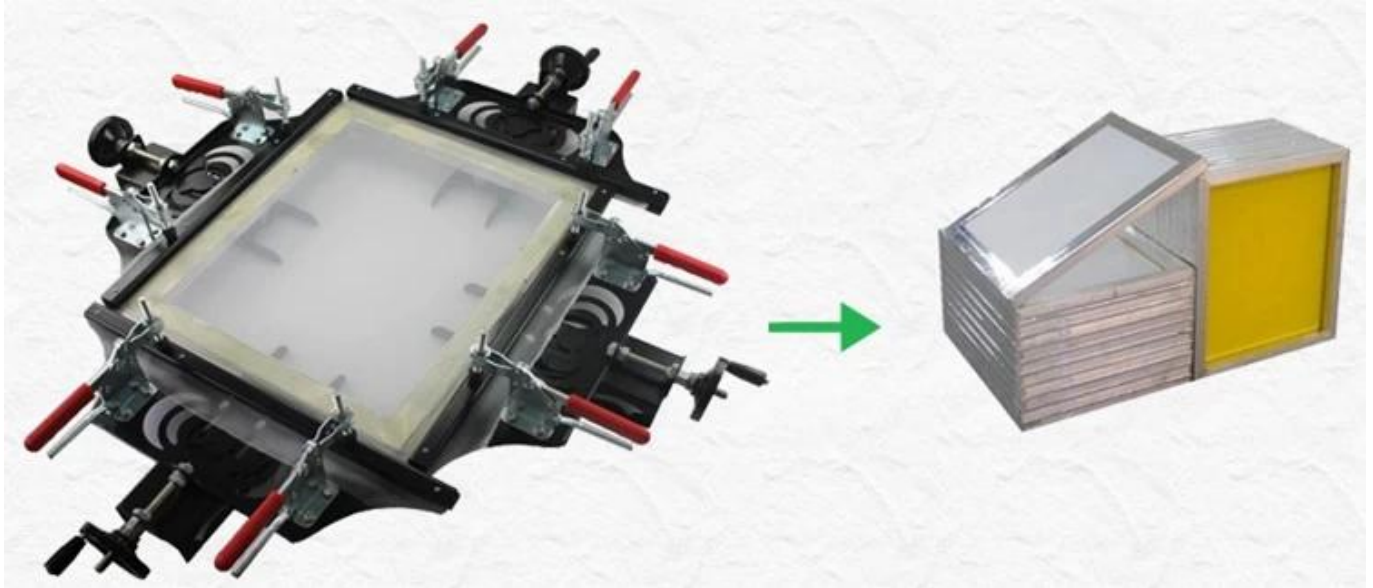

- *Easy frame size adjustment
- *Corner softening capabilities while under tension
- *Compatible with essentially all frame types
- *Stretches directly from the bolt of fabric
- *Utilizes a wide locking bar for easy use
- *No special training or tools required
- *Maintenance-free design

Specification

Model No.	MT-MS03
Min. Stretching Area	250*250mm
Max. Stretching Area	600*600mm
Max. Stretching Tension	50N/cm
Gross Weight	35kg
Package Size	80*74*22cm

Application

The screen hand stretcher is used to make the stencil, it can stretch the polyester mesh on the screen frames, so the machine is a important equipments in making stencil process.

Advanced electrostatic spraying

Sealing rubber strip

IT' s sealed tight when making the frame
