

Description

This machine is applied in cutting circuit board, as well as aluminum, iron, copper, or plastic board; Ruler on the panel ensures accurate cutting. Knives on top and bottom are made of alloyed tool steel, which makes cutting easy.

The metal table shear is designed with the consumer in mind. From its precision machining process to the final assembly, with this metal shear, Aluminum, brass and other hard materials can be cut easily in your production setting. Each unit is ready to use right out of the box, no need adjustments.

Feature

- *Germany classic design
- *Light weight and portable
- *Manually cutting by hand, no need power supply
- *Alloy blade, durable & sharp
- *Make cutting fast, easy and convenient
- *Transparent Acrylic guard plate to protect your hand
- *30cm or 12 inches ruler available
- *Perfect cutting edge

Specification

Item	Metal Cutting Machine
Model No.	MT-XD322
Metal Cutting Thickness	2mm
Size of Machine	390*510*160mm
Max. Cutting Width	32cm
Size of Working Platform	510*315mm
Net Weight	17.5kgs
Gross Weight	21kgs
Packaging	Carton
Package Size	60*40*35cm
Workable Materials	Aluminum sheet, steel sheet, plastic sheet, etc.
