

Description

Our newest sublimation full color change mug would be one perfect choice for you:

- 1) Dishwasher safe (more than 2000 times);
- 2) Very popular among European market;
- 3) FDA/CE/ISO approved;
- 4) Free lifetime technical support on sublimation mug.

11oz color change mug, well coated for sublimation printing. The best coating treatment makes full printing on the mug, vivid color showing, shining all the time. It looks so normal at the first sight, however, the surface of the mug is coated with a special coating which turns to be transparent when 40-50°C water or other liquid is poured into the mug. When the special color coating becomes transparent, your personalized pictures beneath will appear. It lightens your life, and you always enjoy the life every day.

Feature

A thermo chrome heat sensitive coating is sprayed onto the entire outer surface of the mug. Just add hot water and this coating becomes transparent to reveal a wonderful photo image underneath.

Printed with digital sublimation technique this product has all the advantages of a Photo Mug, but the added extra of a color change process.

Manufactured with the finest coatings in the world, this product is dishwasher safe and gives a glossy and vibrant effect that is sure to catch the eye.

With no limitation on artwork your mugs can look as stunning as you wish.
