

## Description

Microtec 4-axis CNC lathe machine with DTF tool holder. This machine is designed for precision machining of various materials. It features a rigid cast-iron bed and a high-speed spindle. The machine is equipped with a DTF tool holder, which allows for easy tool changes and improved tool life. The machine is suitable for a wide range of applications, including the production of precision components for the automotive, aerospace, and medical industries.

The machine has a maximum turning diameter of 400mm and a maximum length of 1000mm. It is powered by a 1200W motor and has a maximum cutting speed of 12000 RPM. The machine is easy to operate and maintain, making it an ideal choice for small and medium-sized enterprises.

## Feature

**High Precision:** DTF tool holder ensures high precision and accuracy in machining.

**Easy Operation:** The machine is designed for easy operation and maintenance, reducing downtime and increasing productivity.

**Wide Range of Applications:** The machine is suitable for a wide range of applications, including the production of precision components for the automotive, aerospace, and medical industries.

**High Speed:** The machine is equipped with a high-speed spindle, allowing for faster machining times and increased productivity.

**Easy Maintenance:** The machine is designed for easy maintenance, reducing downtime and increasing productivity. The DTF tool holder is easy to clean and maintain, ensuring optimal performance.

## Specification

Model	SSB-003
Tool Holder	DTF
PLC	PLC
Control System	K871IP
Spindle Speed	220V
Power	1200W
Turning Diameter	0.4MP-0.6MP
Machine Size	120x80x178cm
Weight	205kg
