

Description

GY-06 is a professional heat press machine designed for sublimation printing. It features a large 15x15cm heat platen, a digital temperature control system, and a safety lock. The machine is suitable for printing on various materials like t-shirts, mugs, and bags. It is compact and easy to use, making it ideal for small businesses and hobbyists.

Feature

GY-06 is a professional heat press machine designed for sublimation printing. It features a large 15x15cm heat platen, a digital temperature control system, and a safety lock. The machine is suitable for printing on various materials like t-shirts, mugs, and bags. It is compact and easy to use, making it ideal for small businesses and hobbyists.

The heat platen is made of high-quality aluminum, ensuring even heat distribution and fast heating.

The machine has a safety lock to prevent the heat platen from opening when it is hot, ensuring user safety.

The machine is compact and easy to use, making it ideal for small businesses and hobbyists.

Specification

Model	GY-06	MAX-200
Heat Platen Size	15x15cm	15x15cm + 15x15cm
Material	Aluminum	
Temperature Control	Digital display, 35°C to 225°C	
Voltage	120V / 220V	
Power	500W / 1000W	
Weight	18.65kg	20.8kg
Dimensions	72x41x73cm	72x42x74cm
Package Weight	21.3kg	26.25kg

Heat Platen Test:

1. The heat platen is made of high-quality aluminum, ensuring even heat distribution and fast heating.

Quality Control on Finished Machine:

- 1. The machine is tested at 200°C for 2 hours.
- 2. The machine is tested at 200°C for 2 hours.

Package

The machine is packaged in a sturdy cardboard box with an instruction manual.

Application

The machine is suitable for printing on t-shirts, mugs, bags, and other sublimation materials.
