

Description

Microtec LED Exposure Machine is a professional UV exposure machine used for exposing PCBs, photoresist, and other materials. It features a large flatbed for easy loading and unloading of workpieces. The machine is equipped with a PLC control system and a digital display for precise exposure time and temperature control. It is designed for high-precision and high-speed exposure, ensuring consistent and reliable results.

Feature

- * UV LED exposure machine with 50W power
- * PLC control system
- * Large flatbed for easy loading and unloading
- LED exposure machine * precise exposure
- * exposure time 40-70s
- * high precision
- * high speed
- * high reliability
- * high efficiency

*LED

Specification

Model	MT-EP03
Dimensions	520 * 610mm
Voltage	220V/110V
Control	0-999
Power	80W/8 10w UV LED
Weight	750 * 680 * 200mm
Capacity	30kg

Application

LED UV LED
