01

01. What is DTF? DTF (Direct to Film) is a printing process that allows you to create custom designs on a variety of fabrics and colors.

02. How does DTF work? DTF works by printing your design onto a special film, which is then transferred onto the fabric using heat and pressure.

03. What are the benefits of DTF? DTF offers high-quality prints, vibrant colors, and the ability to print on a wide range of fabrics and colors.

02

- **01. Design:** Create your custom design using a DTF printer. The design is printed onto a special film, which is then transferred onto the fabric using heat and pressure.
- **02. Fabric:** Choose the fabric you want to print on. DTF works on a wide range of fabrics, including cotton, polyester, and blends.
- **03. Color:** Choose the colors you want to use. DTF allows you to print in a wide range of colors, including CMYK and RGB.
- **04. Size:** Choose the size of the print. DTF allows you to print in a wide range of sizes, from small to large.
- **05. Price:** The price of DTF printing varies depending on the quantity and complexity of the design. However, DTF is generally a cost-effective way to create custom apparel.
