

Description

OTO-24 is a flatbed continuous transfer printing machine. It is designed for DTF printing and garment fusing. It offers higher production with continuous printing, an infrared positioning system, and adjustable infeed and outfeed tables. The machine is suitable for printing on various materials like t-shirts, bags, and more.

NEW!

Flatbed Continuous Transfer Printing Machine

Model No.: OTO-24
Print Width: 60cm

- Higher Production with Continuous Printing
- Offered with Infrared Positioning System
- Adjustable Infeed and Outfeed Tables
- Designed for DTF Printing and Garment Fusing

CE ISO 9001

Feature

High Production:

OTO-24 is a flatbed continuous transfer printing machine. It is designed for DTF printing and garment fusing. It offers higher production with continuous printing, an infrared positioning system, and adjustable infeed and outfeed tables. The machine is suitable for printing on various materials like t-shirts, bags, and more.

Infrared Positioning System:

OTO-24 is equipped with an infrared positioning system. This system ensures precise alignment of the printed material on the substrate, resulting in high-quality prints with accurate registration.

Adjustable Tables:

OTO-24 features adjustable infeed and outfeed tables. This allows for easy loading and unloading of materials, reducing setup time and increasing overall efficiency.

Garment Fusing:

OTO-24 is designed for garment fusing. It can print and fuse designs onto t-shirts, bags, and other fabric items, creating durable and long-lasting prints.

DTF Printing:

OTO-24 is suitable for DTF printing. It can print designs onto various materials, including t-shirts, bags, and more, using a direct-to-film process.

Easy Operation:

OTO-24 is easy to operate. It features a control panel with various buttons and a digital display, making it simple to adjust settings and start printing.
