

Description

Description
Microtec 24" (60cm) DTF Printer equipped with Dual 1200 Printer Heads, a powerhouse designed for precision and efficiency in printing PET film vinyl for clothing. Boasting Epson's original 1200 print heads, this machine guarantees high-speed performance, impeccable resolution, and remarkable durability.

Feature

Feature

»Efficiency Redefined & Precision at its Core
Microtec 24" (60cm) DT7 Printer Heads, a powerhouse designed for precision and efficiency in printing PET film vinyl for clothing. Boasting Epson's original 1200 print heads, this machine guarantees high-speed performance, impeccable resolution, and remarkable durability.

»Ease of Operation
The DT7-400 is engineered with user-friendliness in mind. Its intuitive interface makes it easy to operate, and maintenance is a breeze. Say farewell to complicated setups and laborious upkeep tasks.

»Versatile and Robust
With a printing width ranging from 0 to 600mm, the DT7-400 is a versatile powerhouse that can handle a wide range of apparel types and sizes. Whether you're dealing with t-shirts, hoodies, or any other garments, this pro DT7 solution has you covered.

Specification

Model ID	DTF-08
Printer Head	2530 Epson 1200
Print Width	610mm
Applications Media	RT PET film
Printing Speed	4cm 120s, 6cm 180s
Printing Resolution	720dpi (300x300) 1440dpi
Print Color	KCMY+WWWW
Ink Type	UV
Ink Consumption	Color Ink 34ml + White Ink 54ml per sqm (approx)
Print Head Cleaning	Automatic
Platform Section	Aluminum
Automatic induction winding	Yes
White Ink Storing Function	Yes
White Ink Warming Function	Yes
Operating System	XP, Win7, Win8, Win10
Interface	Cable, Network
Language	EN, Spanish, French, Italian, Portuguese, German, etc.
Volts	110V, 220V
Power Consumption	300±5W
Working Environment	Temperature 15-30 °C
Printer Size (Weight)	1200x1200x1200mm (220kg)
Power Shaker size (Weight)	1200x900x1200mm (180kg)
Packing Size of Printer	1200x1400x1400mm (240kg)
Packing Size of Power Shaker	1200x1400x1400mm (240kg)

MACHINE DETAILS

NO.1

NO.1
Best car stereo
 The best stereo playing what you want, where you want, when the timing and the quality is just what you need.

NO.2

NO.2
Best power windows
 The best power windows offer smooth, quiet, and easy to control windows in your car.

NO.3

NO.3
Best speakers
 The best speakers on board enhance the listening experience and provide the best sound quality to enhance any of the great playing systems in your car.

NO.4

NO.4
Best AC systems and climate control
 The best AC systems in your car, ensure your driving environment and control the heat.

NO.5

NO.5
Best sound systems
 The best sound systems enhance your driving experience and provide the best sound quality to enhance any of the great playing systems in your car.

NO.6

NO.6
Best car stereo
 The best car stereo playing what you want, where you want, when the timing and the quality is just what you need.

NO.7

NO.7
Best car stereo
 The best car stereo playing what you want, where you want, when the timing and the quality is just what you need.

NO.8

NO.8
Best car stereo
 The best car stereo playing what you want, where you want, when the timing and the quality is just what you need.

Differences Between DTF & DTG

Machine	DTF (Direct To Film)	DTG PRINTING (Direct To Garment)
Media Type	Cotton, Polyester, Leather, PVC, EVA Etc	Cotton, Leather Only
Scope Of Application	Suitable For Bulk Printing & DTG Customized Printing	Suitable For Small Shop & Customized Printing
Printing Processing	Whole Automatic Processing Or Manual Processing (Optional)	Manual Pre-treatment Processing
White & Pre-treatment Printing	Normal White Printing	More Pre-treatment, More White Printing On Dark Colored Cloth
Colors	Various & Bright colors	Various & Bright colors
Washing Ability	Strong	Weak
Ink Cost	Cheap	Expensive
Film & Power Required	Yes	No, But Pre-treatment Liquid Required
Heat Press Required	Yes	Yes

Machine Warranty

* 1 Year for entire machine except the printer head and damper/cap top/ink pump/ink tube/ink tank these consumable parts.
* Lifetime online support on machine maintenance.

Application

[illegible]

Machine Maintenance Instructions:

All around print head, Wiper, and Cap Top Lifting Plate Cleanings:
These components are crucial for maintaining the integrity of your printer. Ensure they are kept clean at all times to prevent ink buildup and potential blockages. Regularly inspect and clean these parts as needed.

Trolley Track Lubrication:
Every half a month or, at the very least, once a month, apply a suitable lubricating oil to the trolley track. This ensures smooth movement and prevents any friction-related issues that could affect print quality.

Encoder Strip Care:
To maintain accurate positioning and avoid printing errors, it's essential to wipe the encoder strip with a dry, clean fabric every month. Dust and debris can accumulate on the strip over time, so regular cleaning is crucial.

Periodic Machine Operation: If the machine is not in use for an extended period, it's advisable to turn it on every two or three days. This helps prevent the print head from becoming blocked due to ink drying. You can either print a test strip or schedule some print tasks to keep the ink flowing smoothly.

Continuous Cleaning: Regularly clean the entire machine to ensure it operates at its best. Keep it in pristine condition. Like a new machine, it's ideal for consistent and high-quality printing. This includes cleaning the printhead, rollers, and any other accessible parts that may accumulate dust, ink residue, or debris.

By following these maintenance instructions diligently, you can prolong the lifespan of your printer and maintain optimal print quality. Regular cleaning and upkeep will help ensure that your machine consistently performs like new, reducing downtime and maintenance costs.
