

Introducing the BP-10A Tennis Ball Heat Press Machine: Personalize Every Serve with Precision

In today's booming Print-On-Demand (POD) market, personalization has become the ultimate game-changer in the sports merchandise industry. Whether it's for promotional events, branded merchandise, or custom athletic gear, customers are increasingly seeking unique and personal touches. Microtec's latest innovation, the **BP-10A Tennis Ball Heat Press Machine**, meets this demand head-on with unmatched efficiency, precision, and ease of use.

Why Personalization in Sports Gear Is the Future

The global market for personalized sports equipment is projected to grow exponentially over the next five years, driven by both amateur and professional athletes looking for customized branding opportunities. Tennis, a sport that balances individual flair with professional presentation, is the perfect arena for this shift. From club logos to tournament sponsors, the ability to imprint logos directly on tennis balls offers brands an impactful and memorable visibility tool.

Meet the BP-10A - Designed for Speed, Precision, and Simplicity

The BP-10A isn't just another heat press — it's a revolution in small-format customization. Its **Auto-Open Technology** ensures your workflow is uninterrupted, releasing the press automatically when the timer hits zero. This not only protects your materials from overexposure but also boosts operator efficiency.

Features that make the BP-10A a must-have:

- **Auto-Open Technology:** No more babysitting your press — it opens automatically after the countdown.
- **Quick Change Lower Platen:** Easily switch to a cap heat press
- **Fast Heat-Up Time:** Get to working temperature quickly, minimizing wait times and

maximizing output.

- **Precise Digital Controls:** The GY-06 Digital Controller offers temperatures up to 225°C with a $\pm 0.5\%$ accuracy and up to 999 seconds of timer flexibility.
- **Compact Printable Area:** Perfect for 4x4cm logo transfers — ideal for tennis ball branding.

POD Meets Sports Customization

Whether you're a small business entering the custom merchandise market or a large-scale POD provider looking to expand your sports inventory, the BP-10A opens up a whole new world of possibilities. Make each serve a statement — brand every bounce.
