

Description

Superior DTF thermal transfer hot melt adhesive powder can assist in the precision, speed, and stability for your printers in maximum.

White DTF Powder

When applying the white powder on dark colored clothes, the edges of the design graphic are visible, not as you plan in the computer. The White DTF powder is widely used for a broad assortment of any fabric color clothes, such as white and light-colored garments.

Complete Graphics

The thickness of the graphics feels thin and soft. Moreover, it retains good elasticity without cracking.

Cure Ink Effectively

The hot melting powder only adheres to the ink without sticky with printing film.

Cost-effective & Eco-friendly

In a dry environment, it can be recycled to reduce wasting and preserved for a long time.

How to Preserve

To maintain a perfect status of DTF powder in a long time, please keep it sealed to prevent moisture and storage at room temperature, ventilated and dry place.

Specification

Product Name.	DTF Hot Melt Adhesive Powder
Quantity	1kg/bag (available for customize)
Color	White
Fineness	80-200µm
Softening Degree	110-120 degrees
Types	Coarse Powder/ Fine Powder
