

Description

This mug heat press is upgraded from Microtec Top-selling mug press MP-70, but with a stronger handle, which offers better pressure, and looks more fashion.

Holds 9oz mug and 11oz mug heating element, this mug heat press can transfer the most popular cylindrical shape [Sublimation cup](#)

The side and bottom frame are made of metal, which makes this [Mug heat press](#) strong and durable.

The structure is simple, linear, easy to install and maintain. Good choice for beginner and shoper.

Feature

This mug press can use four different sizes and two different shapes of mug heaters, and can transfer images to 6oz cone mugs, 9oz cone mugs, and 11oz mugs

GY-04 Digital Controller: This digital controller empowers users to achieve accurate and consistent results, meeting the demands of diverse sublimation printing projects.

CE Certificated: The mug heat press has passed the CE certification, with high quality, durable for long term use.

Stronger Handle: Innovative structure of the handle. Make mug heat pressing easier to operate and also save space.

Easy Heater Exchange: Three sizes of mug heater 9oz, 11oz, 15oz are available, can transfer different size sublimation mugs.
