Product Display

E4 is a fully automatic pneumatic labeling machine, using Microtec's latest touch screen PLC controller for more precise temperature control. 4 working stations to improve efficiency, 2 start modes(start by hands or foot switch). Adopt infrared positioning principle to realize automatic

positioning transfer function, very easy and user-friendly for users to operate compared with manual heat press. It is the optimal option for industry use or commercial use, such as OEM, batch transfer printing.

Each working stations size: 15x15cm, 2 working stations on the left and 2 on the right are controlled by one PLC controller. In addition to the infrared positioning transfer function, it also with fixed label card slot, the machine automatically sucks the label onto the transfer material, and then presses down to complete the transfer.
