

Introducing our **Double Matte Hot Cold Peel DTF Film Single Side**, designed for high-quality and long-lasting transfers on a wide range of fabrics.

Made from advanced Nano materials, this DTF film is the ideal solution for vibrant, full-color graphic transfers.

Whether you are printing on cotton, nylon, leather, denim, or chemical fibers, our film guarantees excellent results every time.

Key Features

- **High Durability:** Our DTF film is made from premium Nano materials, making it washable, scratch-resistant, and soft to the touch. It resists cracking and ensures your graphics remain intact for a long time.
- **Vibrant Colors:** The semi-transparent nature of the film allows it to retain bright and vivid colors, ensuring your designs stand out on any fabric.
- **Eco-Friendly:** Manufactured using environmentally friendly materials that meet international protection standards, our DTF film provides exclusive performance while maintaining a sustainable approach.
- **Smooth & Non-Stick Powder:** With a special non-stick layer, this film ensures a smooth transfer, allowing for even heat-transferring powder application and preventing any sticky residue on the edges of your designs.
- **Cold or Hot Peel Options:** Whether you're working with a cold or hot peel setup, this

versatile film adapts to your specific printer's requirements, ensuring a perfect finish every time.

Product Specifications

- **Width Options:** 30cm / 50cm / 60cm / 120cm
- **Length:** 100 meters per roll
- **Thickness:** 75µm
- **Ironing Temperature:** 150-160°C (302-320°F)
