

Description

The Heat Press Mat is an essential accessory for heat press machines and HTV iron-on projects, designed to deliver superior performance and protection. This mat is covered with heat-resistant flame retardant materials on both sides, ensuring it can safely withstand high temperatures of up to 428°F (220°C). Its durable construction provides a reliable and smooth surface that enhances heat transfer efficiency, ensuring crisp and flawless transfers every time. Ideal for a variety of heat transfer projects, the Heat Press Mat offers unparalleled protection for your work surfaces and garments, preventing scorching and damage while ensuring optimal results for every project. Whether you are a beginner or a seasoned crafter, this mat is a must-have for achieving professional-quality heat transfers.

Feature

Heat Resistant: Withstands temperatures up to 428°F (220°C).

Flame Retardant: Both sides are covered with materials that resist burning and heat damage.

Durable Surface: Provides a smooth and reliable base for heat transfers.

Versatile Use: Perfect for a wide range of HTV iron-on projects and compatible with various heat press machines.

Protective: Prevents scorching and damage to work surfaces and garments.
