

Description

This fitted cover slips snugly over the bottom heat press platen, making it easy to dress garments. Protect your heat press and garments.

Feature

Enhanced Durability: Designed to protect the lower platen from scratches, dents, and other damage, this protector extends the lifespan of your heat press equipment.

Easy Application and Removal: The quick-slip design ensures that the protector can be easily applied and removed, saving time and effort during setup and maintenance.

Improved Efficiency: By providing a smooth, consistent surface, the protector helps achieve even pressure distribution, leading to higher quality heat transfers and reducing the likelihood of errors.

Heat Resistance: Made from high-quality, heat-resistant materials, the protector can withstand high temperatures without degrading, ensuring reliable performance over time.

Cost-Effective Maintenance: By minimizing wear and tear on the lower platen, this protector reduces the need for frequent repairs or replacements, saving costs in the long run.

Enhanced Safety: The protector reduces the risk of accidental burns or heat exposure during operation, promoting a safer working environment.

Q:

Why is a cover sheet necessary?

A:

A cover sheet not only protects your garment, it also protects your upper platen from stains, inks, adhesives, and scratches.

Q:

How long will my cover sheet last?

A:

The life of a cover sheet depends on how often you use it and if it's stored and cared for properly. Reusable Cover Sheets are more durable and can last several months. Kraft Cover Sheets are for short-term use.

Q:

How do I clean and store my Reusable Cover Sheet?

A:

You can wipe your Reusable Cover Sheet with a damp cloth and store it in a flat area to prevent any creasing or wrinkles.

Application

Use with 38*38cm, 40*50cm, 40*60cm heat press
