

Description

The SENKO 30 is an exceptional large format heat press designed to cater to a broad range of sublimation needs. This large auto open heat press machine is ideal for applying heat to various sublimable objects including shirts, jackets, mouse pads, tiles, and more, making it a versatile tool for numerous applications. This SENKO 30 Auto Open Heat Press with sliding out bed, it is specially designed with thermal plate dimensions 50X80cm. It is very suitable for large format materials, such as pieces of cloth, sublimation metal sheets, etc.

SENKO-30

Feature

Emergency Stop Switch: With the emergency switch, it is possible to prevent any accidents and errors during the operation of the large format open automatic heat press.

GY-04 Digital Controller: The GY-04 digital controller offers complete digital controls and displays and allows simple operations and settings for the large format sublimation press.

Slide-out Press Bed: The users can easily slide out the heat press under plate with the handle, which makes easier for transfer material layout.

Large Format Capability: The SENK 30 comes equipped with a large thermal plate 50x80cm, making it highly suitable for large format materials like cloth pieces, metal sheets, and more.

Specification

Model number	SENKO 30
Machine Type	Auto Release, Clamshell
Plate size	20"x32" (50x80cm)
Under Plate	Draw-out & Exchangeable
Controller	GY-04 Digital Time & Temp. Control
Printable Articles	Up to 8mm Thickness
Opening Angle	25 degrees
Gas Spring Control	Yes
Voltage	120V / 220V
Power	2.4KW/ 3.6KW
Time Range	0-999 sec.
Maximum Temp	225 C
Temperature Accuracy	±5
Wooden Packing Size	105x97x95cm
Net/Gross Weight	110kg/ 163kg

Application

The SENKO 30 large format auto open heat press is not confined to a single area of technology transfer; it can be utilized effectively across almost all domains of transfer technology, showcasing its versatility. It can handle a wide array of large-format materials, including piece patches and metal sheets, making it a versatile choice for different sublimation projects.

Each Single Copper sheathed heating rod is tested before it is cast in an aluminum alloy or Mica Sheet. These heating rods are comparable to those found in industrial ovens that heat up quickly, work efficiently and last many years. With our industrial quality heat castings, you can get five years worry free warrant.

APPLICATION
